

**Pharmaceutical
Research Institute
Warsaw
Poland**

**Your partner for cooperation in pharmaceutical
research, development, manufacturing
and registration.**

Our offer includes complete development of generic drugs as well as R&D capability in novel drug design, discovery and development, i.e.:

- Patent surveys
- Chemical synthesis
- Active pharmaceutical ingredient (API) manufacturing technology
- Chemical and pharmaceutical analysis of API and drug form
- Unique expertise in the field of API polymorphism
- Drug dosage form technologies, batches for clinical studies
- Bioavailability and bioequivalence studies (GLP)
- Co-operation with CROs
- Registration of medicinal products (CTD)
- APIs manufacturing from laboratory to plant scale (CEP, GMP)

The key assets of Pharmaceutical Research Institute:

People – highly educated and experienced staff

Knowledge – balance between science and industry

Novelty – patents, API manufacturing facility rebuilt in 2006

Quality – GMP, GLP, CEP

Reliability – over 55 years of successful cooperation with domestic and foreign pharmaceutical companies
